SUMMARY

Full-stack and mobile engineer with 3+ years shipping production web and mobile apps across React, Next.js, Flutter, React Native, and SvelteKit. Track record of delivering ahead of schedule for international clients. Open-source contributor, community speaker, and hands-on with cloud, DevOps, and AI-assisted development.

EXPERIENCE

SkyeDesk | Full Stack Engineer (Part-time) | Jan 2026 - Jun 2026 | Australia, Remote

- **Built a sports academy platform end to end:** public marketing site plus private athlete/admin portal (SvelteKit, PostgreSQL).
- **Shipped a Stripe registration and payment system** with validation, duplicate prevention, and dynamic pricing logic.
- **Integrated Zoho Bigin CRM via REST** to sync enquiries and purchases, with node-cron jobs automating athlete lifecycle tracking.
- **Built an athlete management system** with auth, admin overrides, bulk imports, and deduplication (PocketBase, Better Auth, Drizzle ORM).
- **Wired a Playwright/Vitest E2E and unit suite** into a containerized CI/CD pipeline (Docker, Terraform).

Ingenuity Software | Software Developer | Feb 2024 - May 2026

Full Stack

- **Built a tournament management app** with a real-time filtering leaderboard, inline admin editing with role-based APIs, and deep-linked shareable scorecards. Delivered 50+ PRs (Next.js 14, TypeScript, SWR, MUI v5).
- **Built role-based manager and planner UIs** for a field ops platform covering billing, work orders, and routing, with unit tests (React, TanStack Router/Query, Tailwind).
- **Built a Sanity CMS marketing site** with parallax, video background, and scroll transitions, deployed via AWS Amplify (Next.js 14, Framer Motion, Styled Components).

Mobile

- **Built a React Native field service app in under 2 months:** OTP auth flow, Google/Facebook OAuth, photo upload with retry/caching, and a status-driven interactive map (Expo, Zustand, TanStack Query).
- **Architected a reusable Flutter Clean Architecture template** with AWS Amplify/Cognito auth and a cross-platform Dio HTTP client for rapid team onboarding.

General

- **Mentored interns** on production-grade and AI-assisted development workflows through code reviews and guidance.

Freelance Software Engineer | Jan 2023 - Present

- **Shipped a Flutter VPN app to the Google Play Store** in under 3 months, with a companion AstroJS marketing site.
- **Built a community platform (React, Firebase)** handling auth, real-time data, and user management.

Infinity Hub | Software Developer Intern | Mar 2023 - May 2023

- **Maintained a React Native consultancy app** and led a Laravel/PHP networking platform for medical professionals.

EDUCATION

Holy Cross of Davao College | BS Information Technology | 2019 - 2023

- Dean's Lister (3 semesters), Departmental Award, Citation Award. IT Olympiad 2020 Programming Champion.
- **Capstone: FireTracker**, an IoT first responder app (Kotlin, Firebase, Mapbox, MQTT). Presenter, HCDC International Research Congress 2023.

LEADERSHIP & COMMUNITY

- **GDG Davao:** Technicals Deputy Lead (Jan 2025 - Present), Volunteer (2024 - Present).
- **Speaker:** Build with AI 2026 and HCDC Career Talk 2026. Judge: HCDC Capstone Exhibit 2026.

SKILLS

Languages: TypeScript, JavaScript, Dart, Python, PHP, C#, Java, Kotlin, C++

Frontend / Mobile: React, Next.js, Flutter, React Native, Svelte/SvelteKit, AstroJS, Expo

Backend / Cloud: Node.js, PostgreSQL, MongoDB, SQL, Firebase, Docker | AWS, GCP, Vercel, DigitalOcean

Tools: Git, Linux, Playwright, Vitest, Terraform, Drizzle ORM, TanStack, Jira

AI Tools: Claude, Cursor, GitHub Copilot, ChatGPT, Gemini

PROJECTS

- **PocketbaseExtended (C++, Arduino):** open-source library bridging Arduino devices to PocketBase backends. 22 GitHub stars.
- **ApoStore (React, TanStack, Firebase):** open-source POS and merch store for GDG Davao, in active development.
